Play Time: 30 minutes

Othello Images, Video Links & Play Information

Othello Description: Trap other pieces between your own to capture them, but be aware that the opponent may do the same. Pieces will change sides (colors) dozens of times. The winner is the one with the most pieces when no more pieces can be played on the board. The object of the game is to have the majority of disks turned to display your color when the last playable empty square is filled.
