

## Speed Cup Board Game Instructions

The game is very simple. Here's how to play:

### **Setup**

Give each player a set of cups (one of each color, five total). Shuffle the cards and place the deck face down. Place the bell in the center of the table.

### **Object**

Be the first to arrange your cups in the correct order as shown on the card.

### **Play**

Flip over the top card from the deck. All players simultaneously attempt to arrange their cups in the same order as shown on the card. It is important to look at the illustration though, because some cards require you to line up your cups side by side (e.g.: a line of cars), and others require you to stack your cups one atop the other (e.g.: scoops of ice cream).

Ring the bell as soon as you finish arranging your cups. The first player to ring the bell wins the round as long as his cups are arranged properly. If there are no mistakes, he collects the card as a point. Otherwise, the second player to ring in earns the card (if his arrangement is correct).

### **Winning the game**

After all 24 cards have been played, the player with the most cards wins.
