

Stay Tuned: The Fast Paced Tune Playing Game

Before You Begin:

- There are two song cards for each song. Song cards should be paired together with their matching card. Pairs of cards should then be spread out on the table face down.
- Each player should take 1 xylophone piece. Spare xylophone pieces should then be given to players in age order, starting with the oldest player. For example if there are 6 players, each player will have one xylophone piece. Then the two oldest players will take one extra xylophone piece each, ensuring that all xylophone pieces have been allocated to a player.
- Each player should take a drumstick.

How To Play:

- Players should pick one pair of cards from the table.
- The pair of cards should be displayed so that all players can clearly see one of the cards.
- Players should play the song shown on the card by hitting their xylophone pieces in the order shown on the cards.
- The song must be played quickly, to the same beat at it would be sung. The song must not be played slowly.
- If any player hesitates, slows down the playing of the song, or plays an incorrect note, play should be stopped. The offending player is disqualified! This player should hand their xylophone piece or pieces to players with the least pieces in age order, starting with the oldest player.
- The song should then be restarted from the beginning following the above gameplay.
- If players successfully complete a song without any player being disqualified another pair of cards should be taken from the table and the above gameplay repeated.
- Play continues until only one player remains in the game. This player wins!
