Getting Started with Genealogy

Genealogy is the study of family history. Each of us is descended from a long line of ancestors, and tracing their lives can be a fascinating research process. By using information you already know along with the resources and records available, you can explore the past and preserve your family history for future generations.

- **Start with yourself!**
  Begin by listing what you already know about your family, starting in the present and working backwards one generation at a time. Write down vital facts such as dates and locations of births, marriages, and deaths.

- **Record information**
  A pedigree, or ancestor chart is a good way to begin to organize information, and can help you identify the missing pieces of the genealogy puzzle. You’ll also want to note the source of each “fact” as you’ll often find conflicting information.

- **Explore home sources**
  We often already own items that provide clues on our family history. You may be able to find birth, marriage, and death records, family bibles, obituaries, funeral memorial cards, military papers, yearbooks, legal papers, and old letters.

- **Talk to relatives**
  A great way to uncover clues on your family history is to interview relatives. Often by asking open-ended questions, you might just learn more about an ancestor’s life than you’ll find in records.

Records & Resources: Where to Start?

**Census Records.** The U.S. Federal Census was taken every 10 years since 1790; 1930 is the most recent available. Considered the “backbone” of family research, the records show all members of a household that year, and significant facts on each person (i.e. age, country of origin, and occupation).

**Search Online Databases.** The Library subscribes to Ancestry Library Edition (similar to Ancestry.com) and HeritageQuest; both include Federal Census records and can be used from any library computer. Ancestry LE also contains millions of other resources, such as immigration and military records.

**Vital Records.** Death certificates are a good place to start, as they often provide birth date and place, occupation, spouse’s name, and parents’ names. With this information, you can then look for birth and marriage records to learn more about your ancestor’s life.

**Church & Cemetery Records.** In many cases, religious institutions are the only source of early vital information such as births (baptisms), marriages, and deaths (burials).

**City Directories.** These yearly address directories help establish where a person lived at a certain point in time, and can help pinpoint when someone moved, or the year of death. Occupation is often listed as well.

For more information on these and other records & resources, visit the Grosvenor Room website: [http://www.buffalolib.org/libraries/collections/genealogy/subjectguides.asp](http://www.buffalolib.org/libraries/collections/genealogy/subjectguides.asp)
