Winchester	w/West Seneca: 1920, 1932, 1932-1943*
Woodlawn	w/Blasdell: 1928, 1928-1944*

Explanation of Dates

* When an **asterisk(*)** follows a date it means that the map was originally owned by the Census Bureau. This is significant because the Census Bureau's maps were updated over time, by pasting corrected map sections over the top of the original maps. Maps without an asterisk were deposited with the Library of Congress and those maps remained in their original form.

Date ranges – If a date range is shown and is not followed by an asterisk, the range represents the dates a map maker started and finished the map/maps for a locality. When a date range is followed by an asterisk, the end date is the most recent map correction date.

New/additional sheets – These were updated replacement sheets. The sheet image refers to the sheet it was meant to replace.

Location Coverage

Incomplete location /location not included – Sanborn Maps often do not record an entire city or town. Surveyors only mapped areas that were built-up and that they deemed valuable.

If my location isn't listed is it possible Sanborn Maps exist for it? According to the database, if a city is not listed, it is unlikely that the Sanborn Company created a map for it. Some good places to check for maps are with the local governments, libraries, and historical institutions for the location you are seeking.
