- Front Entrance
- South side book drop off
- North Side back
- South Side back

System Investment: **\$6,598.00**

I propose the Clarence Public Library purchases this add on and enhancement of our current security system from vendor Pye-Barker (formerly Amherst Alarm). Our current system was installed and has been maintained by Pye-Barker (formerly Amherst Alarm). Selecting a different vendor would potentially run into compatibility issues with existing equipment. Therefore it is not practical to bring another vendor in for bidding.

According to the Clarence Public Library Procurement Policy:

*"Orders that may exceed \$5,000 over the course of the year must follow the informal bid process unless those purchases are made off current available County, State, Federal or other Municipal contracts **or for other reasons where bidding is not practical**. Multiple purchase orders to one vendor will be allowed if that vendor has an existing Contract with the CPL covering said purchases. All other need to comply with the applicable procedures herewith."*
