becquer well you know a lot of what I do
I can do from home so that's my
proposition can I work from home most
days and just go in when I need to print
reports and that kind of thing so see
how that works
yeah I think the world will be changed
into that modus of operandi I was in the
office yesterday and there were three
other people I was like oh oh
crowd this is so thank you not highway
superintendents no dick no unfortunately
well fortunately are we live streaming
wealth from what you can see it looked good to me so we call Agnes real quick the mess around my iPad to bring it up but yeah it's coming up now okay dickering do you want me to get rid of one of you wait till he comes back yeah he walked away yeah we're live-streaming fine great thanks yeah I think a lot of people are gonna start working from home yeah yep okay this must be Agnes Nathan hi Agnes well she's connecting to audio - hi dick you know if I was going to play a game I turned my computer on and everything would be perfect I tried to do something important and it doesn't work so well
yeah actually this time it gave me trouble I had it said I needed to update the version so then I had to update and it didn't meet you looks like looks like we got everybody so I'll call the meeting to order at 5:06 the one-minute difference from the list board of trustees regular meeting I will entertain a motion to accept minutes from our May 14th 2020 regular meeting I move by Jill op second seconded by Richard urn is there any further discussion hearing none roll call okay so we start with being a sec yes urn aye yeah Becker yes Crawford yes resumed oh yes okay motion is a promotion Bridgette directors report
okay so I actually sent another agenda earlier because a bunch of stuff happened over the last 24 hours so let me get my screen set here with the new agenda.

Bridgette did you see that I sent you back the privilege um no but I think I'm still good let's see yeah you're a host again okay.

all right so here's the agenda that we're gonna be working with tonight I set it out this morning in case you didn't see in your email correspondence happened basically a bunch of emails have been coming in this week grant update I'm going to talk about how
curbside has been working this week and then the three items on new business that was set in the previous email the first part of the correspondence the way Winnie lark is going to be giving us $600 earlier in the year Pamela had gone for a health literacy certification through a western New York library resource council program she received that certification I believe in March and then they as like an an additional funding thing they're gonna give us six hundred dollars to use towards a health literacy either initiative or a program or something to benefit the patrons who come in to the library so basically I just wanted to report that I did receive
that check and it will be sitting in the private local fund until Pamela and I come up with a plan for for those funds so it's specific for health literacy for patrons that come through that the library yeah so I'm when she was actually going through the certification program itself part of it was that she had actually run a health like like a health like beneficial program for the public so she she brought in a brain dance program which was specialized for people with dementia and such so a bunch of seniors came in and we had a juggler and he had this specialized program for them so we got money for that that was already spent and then there they're
giving us an extra to do something
similar to that but there's really no
restrictions on it as long as it's
health related and it's for public use
so how come they gave us the you know
what the email just said we're going to
give you an extra six hundred dollars
and it really did that
much more than that was like here's the
money yeah and they sent us the check so
they're like hold on to the check write
a report to us about your intentions to
use it by the end of June and then once
you use it there's a follow-up report
that we have to send to them so I don't
know if this was a tie in grant they
really did not get get into that part of
it but I'm like 600 bucks we can find
something to do with it okay second
piece of Correspondence okay so on May 29th I was contacted by the BCPL development and communications department they are pursuing a grant to get updated Wi-Fi equipment to boost the signal around certain buildings in our system so we were approached to be a part of that grant I there in the very early stages of writing it so I did forward that information to Jen and to dick Crawford talk to Harold about what would actually be needed and basically we'll keep our fingers crossed that they get the grant because what it'll do is it'll actually push the Wi-Fi
06:58
signal from the building out into the
07:00
park
07:01
so once the park is back open and like
07:03
soccer is going on and all that there'll
07:04
be a stronger white Wi-Fi signal for the
07:07
public to use great I've only had a
07:12
chance to talk to two board members
07:13
since it was so recent about the
07:16
initiative and possibility of the grant
07:18
but just like you to them it's a no
07:21
brainer so if there's a point where a
07:23
letter of support from us or really
07:25
anything else that we could do would
07:27
help with your score or approval just
07:28
let us know
07:30
and Maureen Germain is in the
07:34
development office is the contact for
07:35
that okay the deadline to apply is June
07:41
12th so that so they're currently
07:42
working on that stuff now we could do a
07:44
quick turnaround if need be whatever you
07:46
I would email her tomorrow okay we have
07:51
been approached by the Board of
07:53
Elections to be a physical polling
07:55
location for the primary
07:57
on June 23rd I'm basically with her side
08:04
I have the meeting room set up it's a
08:05
quarantine area for that for materials
08:08
that are returned but I did talk to the
08:11
contact Matt jiaozì through the Board of
08:13
Elections we can most likely set them up
08:16
in the vestibule so I have enough room
08:19
for a table for the poll workers you
08:21
know to sit in front of the meeting room
doors and there's two small alcoves so that they should be able to at least do two voting machines over there so I'll keep you informed right now whoa excuse me but right now they don't you mean voting machines are just taking ballots actually the old what he says as we get closer because they also have their own health and safety protocol so I'm not a hundred percent sure what they need but I should have enough room to a table for patrons as well I'll have to call him next week and get an actual procedure for him and what he actually needs especially with what's going on right now for distancing I'm not sure that that may
work I don't know if there's enough
but if you look at some of these restaurants that are now opening patios
they're using plexiglass shield to separate so you can put four people at a table it's like you're in jail or something and talking through a well a window so they might be able to do it that way because they have the partitions for security and privacy anyway but as Bridget says she'll find out we must expensive wouldn't it be expensive to have to buy that because they're plastic isn't cheap I don't think ya gonna probably use cardboard or something that's what they
10:20
did that's what they normally use I
10:22
don't know if that'll pay these I'll
10:27
have to give him a follow-up call
10:29
tomorrow next week to fight to find out
10:32
more because also I mean the the big
10:35
part of this meeting tonight is gonna be
10:36
talking about when the library should go
10:38
into stage two which would be starting
10:41
to allow people to come to come in
10:42
because right now we're only at stage
10:45
one of the reopening plan which is just
10:47
curbside and not letting anybody in the
10:49
building okay under report updates I
11:00
mailed out the art piece for the doors
11:03
yesterday I heard back unofficially from
11:08
from the state regarding the extension
11:10
for the for the building grant basically
I was told by the contact they're still working to get all those requests formally approved but they said as long as the scope of the project hasn't changed I should be getting with it that's a six-month extension so either way my ex my due date as of right now is June 30th so I sent out the RFPs and we'll see what would end up happening because it needs to be done anyway yeah and then we're still basically we've chose fire safety systems to do this the security cameras I just had one last question with him and I'm waiting to hear back okay so as you know we started curbside on Monday there was a
12:12 huge learning curve on Monday I mean
12:17 basically I can write down these plans I
12:19 can micromanage it I
12:20 you know as much as possible but once it
12:23 once we actually start living it that's
12:25 when we're gonna figure out how this how
12:26 this is actually gonna work so my plan
12:28 didn't change too much but I found that
12:30 there were things that we didn't need to
12:33 do so we were able to streamline it a
12:36 lot better so as I was saying before
12:38 everybody got in the meeting and we
12:40 started pamela created an online google
12:44 order form which is on the library's
12:46 facebook page and it's on the library's
12:48 website so you can either call in and
12:51 one of us will will take your order over
the phone or you can fill out that form
it'll get emailed to us and then if it's
all the orders fill into one spreadsheet
which you know is working out really
great for us because all the information
is in one place and then we can fill the
order call back the patron they can
coment we walk out with masks and
gloves on and everything's in a paper
bag with with all the paperwork attached
to it so far the first day we did about
25 26 orders in the first three hours
and then we did 20 it's been around like
20 to 25 orders per day so far so yeah
so at this point I I want to do curbside
for another week because a lot of the
libraries in the system as I said before
they haven't started opening yet some of them aren't opening until Monday to offer curbside so we're actually a week ahead of a lot of the libraries in the system do you know or do you remember when central and the city branch opening for you know or so the patrons could actually come in on Monday and that's central and it's Meriwether and its crane well see I think it's good because you could learn from their mistakes yeah we've done so much crack with this I I don't want to just do it for five days and then rush into the next stage of this mm-hmm so I'll rather go err on the side of caution do another week
at least and then just see what new information comes out from the state school I agree and you know then you could you know if they find any glitches
[Music]
yeah I have a question is are you sharing like what Pamela came up with with the Google form with the other contract libraries I mean it's it's all it's it's all online so they can see it and they can adapt it however they want to so but I mean by being online do they know it's online do they know where to go to see it yeah yeah there is a joy downtown she made up a huge spreadsheet of every single library and what they're doing and where their websites are and
where to look for stuff so so yeah it's all it's all online website okay I have another personal question about that the catalog can we access when we access it will look this is my ignorance will that let us know where books are and if they're in or out yes yes and what we're actually encouraging people to do that the instructions for online it does state you know we're only limited to items that are in our building the whole system for the system is down right now so here goes the link to the catalog limit your search to to Grand Island and that'll be everything that's available in our building okay do we have any idea when they're gonna
start the interlibrary shipments I do not know that I was hoping to get to get an email before tomorrow with that information I have I have not received that yet we're checking every hour right so so basically at this point I'm I wanted you curbside for another week that'll also allow me to start planning for Stage two because that'll be a whole other safety plan as we get further in into new business the safety plan that I have now is just for Stage one and basically staff health and safety protocols I think I'll have to do another one for Stage two since that includes people coming coming into the building so though Stage two is just
letting them come into the building and come to the checkout desk so stage 2 is fifty percent maximum capacity in the building and fifty percent staffing capacity as well so basically it's going to be allowing people in to browse and to check out during stage two yes okay they're talking about transactional over the circulation desk during stage two that means they're gonna be touching the books because that's what you do when you browse so you still have to clean all returns then oh yeah I mean everything going through that book drop has to go through the mandatory 72 hour quarantine and if people are touching the books in the library too you have
all kinds of people touching and then you know it seems like you know when you clean it and you put it back up and the Shelf before it goes up could be contaminated well so that's part of the health and safety protocols for the public we're gonna have to have a hand since sanitizing station out in the vestibule and everybody's going to be required to wear masks unfortunately this is going to work the same as if you're going to the grocery store I mean there's there's up to a certain level that I can do I can't I can't I can't guarantee anything so I can do it I can put all the stuff there I can put the signs up it's something the the
public's gonna have to use common sense and you know and do what has been asked of them well yeah but when you think about it stores I think are neck to accept returns as easily okay yeah no well I I think I think it's a good point in the rules of conduct now which you brought up I think we should be able to have people removed if they're not following the protocols of a mask and the sanitizer because I think Pat point is right on if they're pulling books out and looking here and looking there what's the sense of it it's you're losing all the safety factors that your built in with with books being dropped
off and recharged yeah I've got a feeling that when phase two also comes out there's going to be additional requirements for hand sanitizing throughout the library in the book areas I would right now for for instance our highway garage I have to have hand sanitizing locations and there is there is some of that language in the phase one but it's not as extensive as I think it should be for Phase two but again we're gonna have to wait and see how they release that and in the in the forward template for the safety program that everyone had to do for Phase one every business in New York State had to do that it's probably going to be a
little bit more restrictive they have
more stations especially at that point
of people touching books pulling them
off the shelf so we're gonna have to
wait and see
or Bridget you may even query that with
downtown so since central and crane and
Merriweather are basically going to be
opening just to stage two on Monday she
that is part of the system of reopening
and safety plan which I had sent to you
guys and adapted it for Grand Island it
is a bit general but and
I mean yeah I'm gonna have to basically
look at our building and see what what
makes sense and order more PPE supplies
and all that stuff so yeah what's the
patron capacity for our library that we have to hold at 50% it's actually a hundred and seventy-five so a 50% capacity is around 87 Pamela I've been talking about this a lot and like we really don't have like a huge capacity unless Alyssa it's it's a program day so cuz that what the other thing I got to figure out from what they're doing downtown is how they're how they're holding those numbers in check like do they have somebody check in and doing a headcount at the door you know like that stuff I don't know yet they just called a manager director meeting for next Wednesday and they're asking for questions from us so that's that'll be a
question that I'll ask them I mean if you think about it if there was 87 people in the library it would be you know in the browsing book area yes it's almost more like an eyeball thing like can you can they are they single spaced out you know and you handle them it's just just daunting because it'll be harder to control whereas we have we have complete control right now just by doing curbside so yes it's figuring out those new protocols and making sure that we're in compliance excuse me there's too many people in the aid of the row could you go browse to be alright you wanna move down to new business new business yes all right so
can I just put in before you go into new business this is the appropriate time
I've been checking into a few things about the private funds don't have all the answers and also the insurance factor which I think will bring up later but I still have to check with Lynn barb cookin no barb bird and I had gone over this pretty extensively and the questions we came up with is a Badescu fund that had specific uses for new material but we don't know how much of that may be left that was one thing there's the tower fund I think that's pretty much spent but I'm gonna check with John Blair who was the attorney for the estate just to get a backdrop on
that and then there was an account for a donation to all different types of donations which were private funds as well so there were three different accounts I think they were kept separate in three different accounts and I'm hoping to verify that with Lynne and have a report back by the next time we meet anybody have any questions on that no thank you No okay and the other thing do you want to bring up the insurance factor and the directors and officers our mission now or later on I mean it's not it's it's up to you if you found out something else well it's pretty much you and I were bouncing this thing back and forth and
we're supposed to get a report from Oh
what the chaps name can supposedly that
the weight and I had to bounce this off
win again is I think it was resolved
that we both thought it was resolved
that the system was going to be
providing directors and officers
insurance and I think that's what you
kind of came up with wasn't isn't that
correct
so what dick is referring to is a is a
webinar that he and Agnes and I sat
through last week from Winnie lark
they have
lawyer on retainer steph nico adams and
she gave a presentation about legal
considerations when reopening her
libraries during this crisis what dick is referring to is checking with insurance with your insurance company to make sure they have directors and officers insurance the library has insurance through the town but there is also insurance that the central library has an umbrella policy for the entire system. I called Ken stone who's the CFO he's he referred me to Jeanine Doyle who's the deputy director for the system she still has not gotten back to me but on paperwork I found from 2014 from lolly insurance company which is the on the carrier for the insurance that they do offer directors and officers
insurance so it would be through central
at least back in 2014 so I'm still
waiting for follow-up on that okay no
sorry go ahead
well we we've had over the years many
discussions about it so I'm just curious
what what came up new to go into this
discussion I don't know I can I can tell
you why it came up because in the was
mentioned a few of us attended they said
that to make sure that you had it and
also that your plan was acceptable to
the insurance company so that it
wouldn't prevent their coverage and so
you first had to find out if you had the
coverage and the second thing is to see
since it's a system provided policy
whether you can how can you best put it
whether the carrier has approved the
safety plans so that we know that they
will cover us in case of any loss as a result of our being opened
so let's put this on the next agenda for a continued item as you get more information keep us updated okay yeah that sounds good okay okay so the safety plan for stage one we pull this up so this is the template through New York forward I know every town building had to do this so this is the one that was filled out for the town and I sent it to - dick Crawford so that I'm town hall would have it on file this one's pretty straightforward I looked at what you
wrote down for the highway department
and then edited it based on what we're doing over at the library so I'm going to take it that I'm gonna take it that the town is okay with this because I hadn't heard anything back yeah it's basically you know the fillable form fill it out and it's on file in the event that the health department comes in and has any questions as to what we were doing so so yeah we're we're good for this for Stage one and we'll see what happens as we continue with two three and four gotcha okay so what happened yesterday was I was creating a cleaning log for the for the non maintenance staff and as I was
attempting to do that

Mary Jean sent us hers for downtown so

so that was what I sent in the last

email to you guys today because under

places here yeah under this part here

hygiene and cleaning basically I have to

maintain cleaning logs on site the

document date time and scope of cleaning

so the policy that Mary Jean set from

Central that's this document did that

switch over for you guys

so we've got the non maintance

Department cleaning logs recording and

filing process so this part is verbatim

what this says

and then going down this just spells out

what logs I'm going to take where
they're going to be kept what's on the logs and because basically I have to keep them all bashed in on file on in within the building and in my office in case anything comes up and there's a question that's asked so these are gonna be separate from what Herald does every day so Herald will have his own cleaning logs and he'll have those kept in his office these are the things that we're gonna be doing after Herald leaves at 2 o'clock so once we get into stage 2 is when this will really take effect so this will be wiping down tables after you swiping down computer keyboards wiping down the door handles the
self-check the circ desk you know and basically just checking and checking the bathrooms we're lucky in that we have the capacity to lock the bathrooms and unlock them with buttons behind the desk that's still going so I think just to keep down the amount of people in the bathrooms at the same time because there's like two stalls in each bathroom so Bridget do you have a log for deliveries yes so we do have a visitor log that's by the door and also deliveries of goods I'm so from what central said because basically the only delivery of goods would be the daily delivery from the drivers from from downtown they already
have their own screening process
downtown for those staff
members so that they've already been
been checked for the day they also have
their own blog so if anything ever came
up I could call down to their supervisor and get that information this
would be part of the safety so if you want I can send this to you if the
town needs this on file as well yeah
send it to me we'll Bridget just to go
back for a second if you personally have any concerns about coverage since the
insurance is through the town and you need to connect with anyone up in
accounting let me know but I'll assume you're feeling fine unless I hear from
you otherwise yeah I think
tweet between the two policies on
everything should should be covered it
really depends on what happens and like
whether it's inside the building outside
the building if you know if it's if it's
a library thing if it's a talent thing
and that's who I would approach
basically but um I work with Jeana
Tedesco in the experience all the time
so whatever there's there's an incident
there's a forum for central there's a
forum for the town I just fill out
everything and send it to everybody okay
yeah I think basically also that the
town policy is for the building and
hazard and property damage and the the
central policy is for live other types of life personal liability but I'm not positive this sounds right to me so may also cut probably also covers the collection because that's still owned by the right yes okay okay any other questions on the cleaning policy new business I had was the rules of conduct wait don't we have to improve that yeah are we gonna call it safety plan or the log uh it's actually both so the safety plan for Stage one okay as well as the cleaning log recording and filing process so I will quickly go through the proposal for the approval of reopening plans whereas the Board of Trustees of
the green a Memorial Library understands
that before the gim L can reopen it must
prepare a reopening safety plan in
accordance with New York State forward
safety plan template provided by the New York State Department of Health and the Grand Isle Memorial Library a reopening plan in accordance with New York forward a guide to reopening New York and building back better developed by Governor Cuomo and the guidelines provided by Buffalo and Erie County Public Library whereas these plans have been developed by the library director and they have been reviewed by the Board of Trustees to provide comments and suggestions
now therefore be resolved that the Board of Trustees the grand now Memorial Library is here by the current copies be it further resolved that the plans will be reviewed at least once every two weeks and update at any time there is a significant change in the timing and/or requirements set forth by the governor or the New York State Department of Health duly adopted by the Board of Trustees or the Grand Isle Memorial Library and a special meeting at a regular meeting held on the fourth day of okay well wait a second doesn't someone you have to move it's a resolution so it's a resolution okay so the resolution all right so it's
safety plan and resolution okay
it's really identified as resolution
2020 - zero to approval of reopening
plans okay so it's resolution point of
information okay 0 0 22 no 2020
22:02 it's right on them the resolution
that Bridget sent to us in the top right
well I didn't bring it out and I did I
don't have a split screen I didn't make
it a splits I didn't pay no it's not on
the computer but ok ok so it's
resolution 2020 - zero - this zero to
approval of reopening plans ok ok
can I ask a question yeah ok I don't
understand first of all who gave us this
resolution this come from the system
isn't or who else I
I asked Jill to help me write the resolution because Mary Jean said all reopening plans have to be approach via resolution at a regular board meeting. Okay now help me out here I'm not the greatest parliamentarian how does this differ from emotion and why it doesn't have to be moved in secondary it doesn't we should have it moved by someone seconded that roll call. That's what I thought. Okay I'll entertain a motion the resolution as read okay a move by boutot seconded by I who came in first there any further discussion okay so now we'll have our roll call. Rizzuto yes Becker yes be in a sec yes
Crawford yes
okay motion passes unanimously
okay so now under a we actually have to for something else to do something about those okay okay so what I need to discuss with you is basically the you it has about in the event that the state so it's another perfectly fine because there's still there be people that are going to be wary of coming into a public building with a bunch of other people so I'm I don't basically the biggest part part would be close closing the building again to people coming in so I mean that that would be built into this however I
I imagine I would need to have another board meeting with you guys in order to get that approved if that ended up being the case. I think you're correct and it would just be a special meeting with the correct timing procedures and go from there. Okay, no I'm done go ahead the way this seems to be is that every two weeks you have to the board is supposed to approve um basically every time we go up a stage because there's going to be more health and safety protocols as we're building the recommendation from the system is to tweak it as that's necessary and they're asking us to review it every two weeks.
depending on how much further we end up reopening the buildings so but if we have to close it would be all of a sudden the opening we would just figure there'll be a better planning scenario and I can set dates and such for moving forward backward I mean if if the governor and the powers that be decide you know hey this this isn't working and hospitalizations are going up you know how that works so yeah I could be on an hour-by-hour basis okay the other question I had about this is moving to stage two basically this is the the systems policy there's two parts of stage two that I have some concerns about and I wanted to see what you guys
thought so the first one is allowing it

says no group gatherings but tutors may be able to meet with a student one-on-one in both the tutoring student are wearing masks to me these two contradict each other honestly if my plan is to pull every single chair off the floor to discourage group gatherings in stage two basically it's going to be come in get your stuff do your business and go because the other thing that they want us to do that I have concerns about is to actually open up some of the computers and a lot of people to use them to me it's I really am uncomfortable at this stage doing that but it is the recommendation of the
system so I wanted to see what you guys thought about that before I made a final decision. I definitely think the problem with tutors are so libraries I think the number place and the other and we probably have liability if someone if a tutor you know caught a virus or if a student thought of that we probably could be held liable if we have them do it in our building right cause it to me we I see it as no group gatherings period me rooms gonna be closed basically everybody's gonna have to be six six feet away away from each other and basically come in do your business and go you know so I find these two
don't don't match I think the rooms
don't I don't know if we need to set if
we have to set our own policy to that
effect and we need to set our own policy
to that effect due to the limitations of
the rooms they usually meet out on the
floors at the tables and you know it's
it's still the same problem you can't
really effectively tutor somebody from
six for six feet away so I just I just
think it should be all or nothing
I don't think it's gonna be confusing to
everybody and I have to send out like a
straight message on you know what the
health and safety procedures are gonna
be it seems like people could do some
tutoring people who do the tutoring tend
44:52
to be like really young teachers who
44:54
would know how to use the technology
44:57
kids are being
45:09
hurting anyone coming through all right
45:27
oh you got a moocher you got a mutant so
45:38
alright the level of tutoring at your
45:41
specific library tend to drop off during
45:43
summer yeah so I'm hoping based on the
45:46
timing of this that this becomes a
45:48
non-issue so but I'd rather have had the
45:53
final wording in in the approved
45:55
document set so my my gut is telling me
45:59
to just have no group gatherings period
46:01
if I mean I know there was a huge push
46:04
to have the computers and the printers i
46:06
i i just am nervous about having
46:09
somebody just sitting there for a long
time you know when i'm nobody else is
allowed to you know so i mean we can
limit the computer usage to a few
minutes but i really think that that
should be moved to stage 3 honestly
well is it is it's something that we as
a board need to express in writing to
Mary Jean no it's basically whatever
whatever we agree as a group to go in
this plan and what you guys approve is
what i would go with okay all right so
we don't have the wording of the plan
and this you'll just be an attachment
that you're gonna put in right no
actually this what once this is once the
wording on this is all set this i have
to post this to the public yep okay so
so like on the minutes do I have to give the wording or it just you just reference the document right I would say reference document okay but it just won't be there so there's no reason to say anything about it right let me find the part with the computers well if somebody if somebody looks at another library where they're doing it they may say well why isn't Grand Island well yeah specific limitations in our building yeah I mean I can't I do have enough room for social distancing with the with the computers but to me that like the gathering and and and sitting in the building for a long time
I can try it and see and see where it's at and then pull it if it becomes a problem but I'd rather be consistent all the way through this is there a time limit you're comfortable with on the computers with social distancing I honestly did almost all the studies that were reading and everything they're saying no more than fifth and 15 minutes which I can set those computers to I mean that that's a short time but people totally is to realize and in do we say you can't have more than well I mean they're going to go fifteen minutes go out to the car have a listen to the radio come on back yeah I don't know this this one has been a real sticking
48:35
point with me yeah if you're gonna let
48:39
you know the patrons use the computers
48:41
are you gonna put covers on the
48:43
keyboards though that you're supposed to
48:46
be giving keyboard covers yes okay so
48:48
even after every little 15-minute
48:51
increment and somebody leaves and you'd
48:53
have to go wipe down the workstation
48:54
correct so that's - well you're just
48:59
fine because we can at what wait that's
49:01
actually on on the cleaning log then I
49:03
made up so so it would just be a regular
49:07
thing that we would run around anew so
49:10
in stage two there will be no self check
49:14
right no checkout no I said there will
49:17
be self self check yes okay so we just
49:22
gotta run around after people and wipe
it down after they touch it it's just
the more staying in the building and
hanging out for a while that I'm a
little nervous
well you know what maybe you start with
the 15-minute limit I mean because 15
minutes is a reasonable amount of time
for someone to come in and browse find
something and leave and so it would be a
comparable amount of time to hop on a
computer and do whatever they want to do
and then if you find patrons are asking
saying you know I don't have a home
computer
I need search for a job yada yada ya you
know you might have to revisit that and
think about it if that's if that's truly
a prayer and I mean and it's it's not hard to get to get the time limit change that's just a call to IT and they would just you know do it right then if it became a thing so okay so I wouldn't actually put down 15-minute time line here because it basically which basically says it would it would be limited usage regardless all right so then I can go ahead and try that limited to 15 minutes per use and see what the response is because um we do have 24/7 Wi-Fi going on and in the parking lot so if somebody really needed it and they just you know wanted to use it on their phone just to check email or whatever that that service never ended
so um there I didn't have one question

you could possibly if you wanted to say

15 minutes per 24-hour period so then

the next day they could come again if

they wanted to I don't think I need to

restrict it I would just like just sit

there check check your email for 15

minutes if you have something that he's

printing go and do it and then get your

stuff and then you know move on because

I'm gonna be limited to how many people

I'm allowed to have in the building at a

time if you had 87 people in the library

then you might have to do that oh yeah I

know you don't want to talk about this

forever but just now my own idea but

just something we use from within the
town if you're really concerned about
making sure those people who are in need have accessibility you could pursue it by appointment only you know and actually now that you say that Pamela said that too just just something for the trustees to think about you to think about so not only does that person need it get it but they can be sure that as time they come it's not already crowded it would give you a little bit more control over the situation thank you yeah that's that's actually a really good idea Pamela brought that up for in case we get a lot of people that that want in at the same time to do to do a pointment
only to come in and browse but I didn't think about that for the computers and we actually have that procedure set up already. I built it's built with into the software that that controls it so huh great great great great okay sounds like a good compromise I can try I can try that out once we were in a stage two. [Music] I'll entertain a motion to accept the policy as presented somebody moving this I will don't forget that Dix muted and we have a motion to move it by pandas or a second Gino second Jill seconds any further discussion
okay roll comm Rizzuto yes innocent yes
okay um Becker yes
Crawford yes yeah okay okay
thank you one sec let's try this again
share screen okay I should have the rules of conduct up the proposed changes are in red basically what that webinar that we attended through when he lark amended updating the rules of conduct number 17 could you repeat it because I'm having trouble reading it okay so number 17 says due to the coab in nineteen pandemic the wearing of face coverings is required of all patrons except for those under age two and those who cannot medically tolerate masks until the requirement is waived by the
New York governor and or the New York State Department of Health so where where the standards set forth besides wearing a mask using scent are you putting down using sanitizer no just just masks I think you should put in sanitizer especially if they're going to be touching books would you like to work that well you have masks just put down and required to have sanitizing well the building plan howdy requires that under that New York state plan so here here you're going to use this as a standard so that they don't comply then the director or staff has the right to ask them to leave I guess as so far as a directives are the directives that the
governor pushed through it allows us to enforce the masks I don't think there's anything from the governor that allows me to enforce the hand sanitizer use so I know we look at putting that in there where I think you can and I think that if you want to keep up the standard contamination you need that I think it's important to everybody you sanitizer otherwise you're going to be possibly contaminating a good portion of the collection right well then I mean you only require it in the vestibule as they enter or if they're for 15 more minutes do you make of them re-- sanitize as their inner browsing and
touching you know it's not like a mask
where it's on or it's off definitely
have hand sanitizing stations throughout
throughout the entire public area with
signs everywhere I mean I I agree with
you dick I just I just don't know if I
had the New York State directed to back
me up on it yeah my you don't you don't
have to worry about it you can be
 stricter because it's our we administer
the use of the facility okay there's a
lot of other things in the rules of
conduct that aren't there well you know
a lot many small business people are you
know people have told me made this
director directive about the masks and
that his words were something if you
have a problem with it blame him it's not my fault you know and he would take the blame because people are being nasty sometimes nowadays and I know from what you know one of my children who lives in Ohio said that she went into a business and she was wearing a mask but in their case the owner and another she was only patron with a mask and people started making nasty comments and for some people they're politicizing this that like you know not that you're worried about your health and other people's health so I think that it's us just to go peepee of cover that like so you know what I'm saying if you don't want to change it I'm voting no
okay tell them to go as you want fine I
just have me registered as and they're
gonna vote not be happy with it um what
kind of language would you suggest I put
in there no we've I just wrote something
up quick the grand Royal Library will
provide and maintain and hygiene
stations for personnel and patrons
within or throughout the library okay
should I be putting the rules of conduct
or in the safety plan well it's already
in the safety plan that's why I
questioned whether it also has to be in
the rules of conduct but as dick said we
we have the ability to add or or not
whatever we feel necessary yeah I'm not
against putting it in I just want to
59:07 make sure that I'm doing what's
59:09 what I'm allowed to do with this so
59:11 then say that why don't we approve this
59:14 with number 17 as written 18 17 and look
59:19 into adding a new statement it won't it
59:24 won't take much to approve this we can
59:28 get a good statement written up and pop
59:31 with Mary Jane and others and go from
59:34 there that's my suggestion I'm gonna
59:41 vote no go ahead and do what you want
59:45 please have a roll call pet okay so
59:49 needs to make a motion first I hope that
59:52 we approve the addition of item number
59:54 17 as written to the rules of projects
59:58 I'll second that
60:00 okay move by Juno seconded by Agnes
60:04 anyway okay hearing on roll call
okay be in a sec hi Becker
yes okay let's see Crawford
I earn no rizzuto yes Bridget I'll work
with you on there to get something
written up okay whatever whatever all
right phone call with the phone caller
Oh dick and Bridget just so you look at
the language you know the the rules of
conduct start by saying the following
conduct is prohibited so if you're going
to require hand washing or sanitizing
you have to somehow make sure that it's
introduced along those lines like
handling books without sanitize prior
science sanitizing of hands is
prohibited or something you know what I
mean we could use the same language
that's in number 17 do the code 19 pan
gentlemen we encourage patronage
somebody could come in that's allergic
to alcohol and maybe they want to
sanitize by soap and water
and maybe they did it before they even
walk in the door because they were
thinking the exact same things you know
it's it's harder than math because you
can have allergy issues you have several
choices to do hand sanitizing and a lot
of people have them clipped right on
their purse and they diplom you know
automatically like as they enter a
building or that sort of thing so that's
you know if somebody's somebody's
allergic to it okay then you're
absolutely right they're gonna be carrying something well we're not telling them to use our sanitizer we're just telling them to sanitize that's all so we've had good discussion if any skee has specific language they think should be written into this please email it to the full board and in the meantime Bridget and I will talk it will talk to downtown and see what they may already have there could be something already and face to with it and we can move forward in that direction does that sound like a fair plan hmm sounds great mm-hmm all right okay Bridget okay rules of conduct I believe that was the last item on our
agenda I could give my battery I'm just gonna reiterate I'm gonna do another week of curb sign as long as I don't hear anything to the contrary during the week the goal will be to start trying to move to stage two on June 15th I'll keep you guys appraised of that that's where we have a date for our next meeting we do not know we're gonna go September unless we have to do something unless something changes with this bull pandemic yeah I definitely have another special meeting before we hit September so looking at my calendar the next regular meeting let me shut this down the next regular meeting is scheduled for Thursday September 3rd at 5:30 well
like I said with as we move through summer I'm sure I'm gonna be calling you guys for another we usually hit one in July don't we yeah when the contract comes out for a parole yeah we have to hit one in July actually I think the reason we didn't set the date is that all of us pickin December didn't know what our vacation plans were that and usually it's depending on what I actually received the contract during during that month so okay my date to read yes good to me

any other topics for the good of the board Bridget you'll be able to give me back host controls so I'll be able to
after you quote it'll be easier to stop
the YouTube livestream no thanks okay
and we need an adjournment no you have
something I just wanted to say many many
thanks and kudos to Bridget for dealing
with all this because who would have
ever expected such an interesting
challenge when I lived up to our
expectations and superseded them so just
wanna say thanks can i still I'll entertain Jim entertain a motion takes
I'll entertain a motion at 6:09 that the
meeting comes to an end by jill bana
Zack okay there a second okay second any
further discussion roll call okay BNSF
aye
Becker yes Crawford aye
his phone died
okay and he agreed by default okay we'll
put him down as an okay thank you
everybody stay safe stay read books
